## The Guardian Eye (formerly TGEYE) 2.5.1

Lock your computer by remotely tracking keystrokes and Internet activities and see what is happening on your target computer. The Guardian Eye is a lightweight software application whose purpose is to help you monitor a target computer and get information about every keystroke and clipboard change, as well as accessed websites and programs. In addition, you may take screenshots, send logs via email or FTP connections, and block certain websites and Windows features. Clean feature lineup You are welcomed by a well-organized set of features, which makes it easier for rookies and professionals alike to set up the dedicated parameters. General settings The Guardian Eye gives you the possibility to pick the installation directory, automatically send logs at a custom number of minutes, specify a custom filename, as well as set up a master password. Logging tweaks The application lets you enable the key logging process and log viewer, disable Windows Task Manager and Registry Editor, and export log data to plain text file format. In addition, you are allowed to run the utility at Windows startup and read clipboard information. Email and FTP configuration parameters You can make The Guardian Eye send logs via email to a user-defined address. You are allowed to specify the username, password, SMTP server, and email address. Plus, the tool is able to send notifications when the program is started on a computer. Logs can also be sent via FTP connections. Other useful monitoring options The Guardian Eye helps you automatically take screenshots at a custom number of minutes, opt for high-quality PNG or low-quality JPEG images, send screenshots via email or FTP, and save the captured images locally. Furthermore, you can create a list with the websites that you want to block, uninstall the utility from the current computer, enable Task Manager and Registry Editor, and remove the app from the startup. Summary: Best Prices for Shoppr This Shoppr review is designed to help you choose the best offer according to your needs. Whether you're shopping for yourself or buying gifts for others, we make your shopping experience worry-free and hassle-free. Get up to \$50 in Free Gifts with our Special

### What's New In?

----- The Guardian Eye (formerly TGEYE) is a lightweight software application whose purpose is to help you monitor a target computer and get information about every keystroke and clipboard change, as well as accessed websites and programs. In addition, you may take screenshots, send logs via email or FTP connections, and block certain websites and Windows features. Clean feature lineup You are welcomed by a well-organized set of features, which makes it easier for rookies and professionals alike to set up the dedicated parameters. General settings The Guardian Eye gives you the possibility to pick the installation directory, automatically send logs at a custom number of minutes, specify a custom filename, as well as set up a master password. Logging tweaks The application lets you enable the key logging process and log viewer, disable Windows Task Manager and Registry Editor, and export log data to plain text file format. In addition, you are allowed to run the utility at Windows startup and read clipboard information. Email and FTP configuration parameters You can make The Guardian Eye send logs via email to a user-defined address. You are allowed to specify the username, password, SMTP server, and email address. Plus, the tool is able to send notifications when the program is started on a computer. Logs can also be sent via FTP connections. Other useful monitoring options The Guardian Eye helps you automatically take screenshots at a custom number of minutes, opt for high-quality PNG or low-quality JPEG images, send screenshots via email or FTP, and save the captured images locally. Furthermore, you can create a list with the websites that you want to block, uninstall the utility from the current computer, enable Task Manager and Registry Editor, and remove the app from the startup. Final thoughts All in all, The Guardian Eye comes packed with several useful monitoring options. On the downside, it has not been update for a while so you may bump into compatibility issues on newer operating systems. We have tested it on Windows 8.1 Pro and come across several crashes. Review Overview Total Score Summary Review DateMay 2018 Last review 05/04/2019 4.7 4 0 Easy to use and helpful on a command line based task The program is quite easy to use for novice users and experts alike. The program allows you to view and manage the process of target computer in details. Moreover, it is quite easy to export the log files, or store them for further reference. Summary Review
